vice head of the department
Geography Department, Faculty of Arts
University of Ljubljana¹**

To Whom It May Concern!

Ljubljana, 21st April 2015

Dear Madams/Sirs:

My name is Blaz Repe and I am writing from the university teacher position at Ljubljana University where I teach physical geography, soil and bio geography, geoinformatics (GIS) and thematic cartography. Since 2012, I had the opportunity to teach or work with our student Boštjan Kop. He is currently finishing his Master thesis under my mentorship.

I have been acquainted with young Mr. Kop for the last three years as a student in his master's studies at our department. He is an intelligent, perceptive and trustworthy person. Since his enrolment into our department in 2012, he has been not less than a dedicated student. His above-average performance is a direct result of his dedication to the problem he is working on. His sincere aim to create a positive atmosphere, both for students and teachers, shows his unique character in our student community with positive attitude towards life. Furthermore, his hard work, vivid energy and determination have gained him the responsible opportunity to become a very good student in his class. During his studies, he has demonstrated his skills in the field of geoinformatics on various projects – land cover change analysis, habitat suitability modelling, location-allocation analysis, GIS based models, simulations and scenarios, 3D cartographic representations, remote sensing and more.

Again, Mr. Kop is a very dedicated student and always eager for knowledge. By attending your advanced Land Training Course, he wants to improve the knowledge on theory and applications of land remote sensing. This kind of student definitely deserves my recommendation. Thus it is of my pleasure to recommend him for the ESA Land Training Course 2015, he is applying for.
